

MORE DRONE KILLING - WHO BENEFITS?

Why does President Obama keep launching drone attacks in Pakistan and Yemen, killing illegally and indiscriminately, devastating communities and breeding anti-American hatred?

Why is he now sending killer drones into Iraq to do the same things? **Who benefits** from this?

President Obama greets David Cote, Honeywell Chair and CEO at the White House in 2009. Getty Images.

What if we told you that:

- **Honeywell International Inc., one of America's top political donors**, was achieving record stock prices not only from selling home thermostats and dehumidifiers but from its military deals, including a \$400 million contract to produce and service engines for MQ-9 Reaper drones.
- **Honeywell International** is profiting handsomely in Iraq, providing services to major oil and gas corporations, all of whose lucrative deals hinge on U.S. military presence around the world.
- **President Obama** has made David Cote, Honeywell's Chair and CEO, as one of his closest advisors in the business community. Mr. Cote's pay in 2013 was \$25.4 million.
